

ANDI MUHYI MAYAPADA

FULLSTACK DEVELOPER

ABOUT ME

Fullstack Developer experienced in building scalable, high-performance web applications using .NET and modern JavaScript ecosystems. Skilled in developing end-to-end systems, from backend architecture to responsive frontend interfaces, with a focus on clean code and efficient development workflows.

WORK EXPERIENCE

PT.PILAR TIMUR TEKNOLOGI | November 2022 - Present

Fullstack Developer

Developed and maintained various web-based applications across multiple domains, focusing on scalable and efficient system architecture.

- Built and enhanced e-commerce platforms, including product management, pricing, and transaction workflows
- Developed Point of Sale (POS) systems to support daily business operations and sales tracking
- Contributed to Learning Management System (LMS) development for managing courses and user activities
- Developed clinic management systems, including patient data handling and operational workflows
- Implemented inventory management features (product, pricing, stock control, and reporting)
- Designed and developed both backend and frontend components using modern technologies
- Collaborated with teams to deliver maintainable and high-performance applications

PT.QWORDS COMPANY INTERNATIONAL | June 2022 - September 2022

Fullstack Developer

Developed and maintained web-based systems with a focus on payment integration and service automation.

- Built and integrated payment gateway modules to support secure and reliable transactions
- Customized and maintained WHMCS for billing automation and client management
- Developed and managed APIs for system integration and service communication
- Designed and implemented responsive landing page UI using CSS and Sass
- Ensured system performance, reliability, and maintainability across multiple services

PT SAWARGA DIGITAL INDONESIA | April 2021 - July 2021
